

Maneesh Anand K N
Engineering Leader | Digital Health, AI/ML, Regulated Industries, Compliance
Austin, TX • 469-449-3930 • [Email](#) • [LinkedIn](#) • [AI/ML Portfolio](#)

Global technology and engineering leader with 20+ years of experience driving large-scale software delivery, digital transformation, and organizational excellence across regulated industries, including medical devices and digital health. Proven track record of leading distributed teams, scaling SaaS/DaaS platforms, and establishing engineering operating models that improve execution predictability, quality, and cost efficiency. Known for aligning Product, Architecture, and Engineering to deliver complex, multi-product portfolios while embedding security, compliance, and operational rigor into execution. Recently completed advanced AI/ML training with hands-on experience in GenAI, LLMs, and production model deployment.

CORE CAPABILITIES

- **Engineering Leadership & Strategy:** Global Team Leadership, Organizational Design, Operating Model Transformation, Change Management (PROSCI), Budget Ownership, Strategic Planning, Danaher Business System (DBS), M&A Due Diligence & Integration
- **Software & Platform Engineering:** SaaS/DaaS Delivery, DevSecOps, CloudOps (AWS, Azure), SDLC Governance, Platform Engineering, IoT/IIoT Systems, Scalable Architecture
- **Execution & Delivery Excellence:** Portfolio & Program Leadership & Governance, Road mapping & Release Planning, Dependency & Risk Management, Agile/SAFe Transformation, KPI-Driven Execution, Vendor management, Innovation management
- **Security, Compliance & Quality:** HIPAA, GDPR, IEC 62304, ISO 13485, SBOM, FedRAMP, Secure SDLC, Incident Response, Vulnerability Management
- **AI / ML & Data:** Model Development & Deployment (Python, Scikit-learn, TensorFlow, Keras), Deep Learning (Neural Networks, CNNs, Transformers), Natural Language Processing (LLMs, Prompt Engineering, RAG), Supervised & Unsupervised Learning (Regression, Trees, Clustering, Bagging, Boosting), Model Tuning & Evaluation, Data Analysis & Visualization (Pandas, NumPy, Seaborn), AI/ML Ops & Cloud Platforms (Google Colab, Hugging Face, Docker)

PROFESSIONAL EXPERIENCE

Danaher/Beckman Coulter Diagnostics, Austin, TX
Senior Manager Software R&D | 07/2021 – 11/2023

Led global Clinical Informatics R&D for a portfolio of SaaS/DaaS and regulated software products, spanning cloud, on-prem, and hybrid deployments in highly regulated healthcare environments. Managed a distributed organization of 60+ engineers and leaders across six countries, balancing delivery predictability, regulatory compliance, and platform evolution.

- Established a unified engineering operating model across SDLC processes, tooling, and release cadence—bringing consistency to execution across geographically distributed teams while minimizing overhead across global teams.
- Led **cross-team execution and alignment** across multiple engineering groups delivering concurrent cloud and on-premise releases, improving predictable delivery and reducing last-mile risks.
- Translated product and architectural priorities into executable roadmaps for a 7-product SaaS/DaaS portfolio, defining milestones, sequencing dependencies, and aligning capacity with delivery commitments.
- Drove **structured dependency management and risk mitigation** across teams; identified delivery risks early, removed roadblocks, and escalated with clear options and data-driven recommendations.
- **Standardized engineering quality practices** (test strategy, release readiness criteria, and defect management) —resulting in a 20% productivity increase and 80% improvement in secure release throughput within 14 months.
- Embedded security, privacy, and regulatory compliance (HIPAA, GDPR, IEC 62304, ISO 13485) into engineering delivery practices, achieving 100% compliance across products and vendors.
- Established a structured operating rhythm for **execution governance**, including status reporting, risk/issue reviews, and release readiness updates for executive leadership.
- Advanced DevSecOps maturity by operationalizing vulnerability management, incident response practices and SBOM, aligning with federal cybersecurity expectations under Executive Order 14028.
- Led FedRAMP gap assessment and cloud security enhancements, strengthening compliance posture and readiness for federal standards.

- Implemented a **24x7 CloudOps** strategy across business units, driving scalability and forecasting a 30% reduction in operational costs.
- Improved cloud **cost governance** (AWS, Azure), achieving 10% annual cost savings through improved resource management and cross-team collaboration.
- Led organizational change, hiring and leadership development initiatives, building high-performing global teams in a matrixed environment.
- Drove adoption of Danaher Business System (DBS) practices, establishing KPIs and continuous improvement mechanisms across engineering and delivery functions.
- Supported **M&A integration** readiness and technical due diligence efforts, aligning people, engineering processes and tools for seamless integration.
- Evaluated HL7-based interoperability and medical device data integration capabilities of a potential M&A partner, assessing alignment with existing platform architecture and scalability requirements; provided technical due diligence inputs for acquisition decision-making.
- Tech Environment: Java, React, C++, .NET, C#, JavaScript, AWS, ADO/Azure, OCI, Snowflake, JIRA, Confluence, Bamboo, Jenkins, SharePoint, TFS, Angular, Adobe-XD, Figma, Linux, VPM/iObeya

Viavi Solutions, Indianapolis, IN

Senior Manager, Software Engineering | 02/2016 – 07/2021

Led global engineering delivery across embedded, firmware, cloud, and web platforms for a portfolio of SaaS/DaaS products. Managed 60+ engineers across the US and Europe, driving execution excellence, portfolio governance, and product scalability. Provided strategic oversight on program delivery, risk mitigation, and cross-functional coordination, across product lifecycle using **People, Process, Tools** framework.

- Directed delivery of **9 global products**, aligning engineering execution with product strategy and revenue growth (\$77M annually).
- Managed **\$10M+ budgets** across multiple business units, optimizing resource allocation and product lifecycle investment strategies.
- Established a **portfolio-level planning and execution framework**, improving organizational efficiency by 15%.
- Implemented **technical debt and prioritization strategies**, increasing engineering efficiency by 25%.
- Led **Agile transformation** across geographically distributed teams, improving integration with hardware teams and accelerating delivery timelines by 30%.
- Played a key role in building and scaling a **Center of Excellence in Romania**, strengthening global delivery capabilities and innovation.
- Enabled strong **cross-functional collaboration** across Product, Sales, Hardware, Manufacturing, and Operations.
- Tech Environment: C, C++, Qt, JQL, JIRA, JavaScript, Confluence, Bamboo, Jenkins, SharePoint, Angular, VxWorks, Linux, iOS, AWS.

Flextronics, Irving, TX

Consultant Agile Practitioner | 12/2015 – 02/2016

Drove Agile transformation in a regulated medical environment, establishing structured engineering execution frameworks and governance.

- Delivered the Agile Framework for two complex medical device programs - a portable X-ray system for **Hologic** and an ophthalmic surgical/imaging solution for **Alcon** focused on floaters and artifact reduction.
- Led rapid **Agile adoption across cross-functional teams**, achieving full integration within two months.
- Designed and implemented **engineering program governance frameworks** aligned with IEC 62304 and ISO 13485.
- Enabled alignment across software, hardware, QA, and regulatory teams for improved execution and compliance.
- Tech Environment: C, C++, JIRA, Confluence, SharePoint

New York Air Brake (TDS), Irving, TX

Software Engineering Manager | 11/2005 – 09/2015

Progressed from individual contributor to engineering leader, managing embedded systems and analytics platforms for North American and global railroad customers.

- Led a 23-member engineering team delivering embedded software, data analytics, ML, safety and early IoT solutions
- Delivered 5 commercial software products, competing with industry leaders in rail technology
- Developed real-time tracking, analytics, and asset management systems, improving operational efficiency and safety
- Built cross-functional teams spanning development, QA, and data systems
- Tech Environment: C, C++, Qt, Shell scripting, R, Perl, JQL, JIRA, Confluence, Jenkins, Bamboo, QNX RTOS, Linux, VMWare, AWS

ADDITIONAL RELEVANT EXPERIENCE

Wipro Technologies – Software Project Lead (Telecom – Lucent, Nortel)

Spectrum InfoTech – Project Lead (Aviation & Embedded Systems)

EDUCATION

- **PGP Artificial Intelligence & Machine Learning** – UT Austin
- **MBA** – UT Dallas
- **MSEE** – UT Arlington

CERTIFICATIONS

Certified Change Management Practitioner (Danaher/PROSCI) • Certified SAFe Agilist • Certified Scrum Master
• Certified Scrum Product Owner

PROFESSIONAL DEVELOPMENT

- PMP (68 hours of training)
